This whole area represents some of the countryside of our towns, with lands dedicated to agriculture and cattle ranches that become what many people have called the heart of the country. A striking characteristic of this area is the dramatic contrast in topography.

Several small and medium-sized rivers that range throughout the plains make the region very fertile. The residents practice fruit trees, rice paddies and cattle ranching.

The main attraction of this area is by far the Arenal Volcano, which rises 1,633 meters above sea level showing off one of the main characteristics with its almost perfect conic shape. The attraction of this volcano has helped to develop the area as a prime destination in the country.

Check in at Arenal Manoa hotel, where you will be staying the next two nights.

Experience the calming effects of thermal volcanic hot springs: the hotel offers two hot spring pools and a jacuzzi.
